About Us

Welcome to our steel doors & Windows company!

We are a leading importer and supplier of high-quality steel doors for residential, commercial, and industrial applications. With years of experience in the industry, we take pride in offering a wide range of durable and secure steel doors that meet the highest standards of safety and aesthetics.

Our team of skilled professionals is committed to delivering excellence in every aspect, from design to production. We use premium-grade materials and advanced manufacturing techniques to ensure that our steel doors are not only strong and sturdy but also visually appealing and customizable to suit your specific needs.

Whether you are looking for entry doors, security doors, fire-rated doors, or any other type of steel door, we have a comprehensive selection to cater to your requirements. Our customer-centric approach ensures that you receive personalized service and expert guidance throughout your journey with us.

At Semco India, we prioritize customer satisfaction, timely delivery, and competitive pricing. Trust us to provide you with the perfect steel door solution that combines functionality, durability, and style. Thank you for considering us as your trusted partner in securing your spaces with our top-notch steel doors.

Salient Features

- All weather resistant paint
- Safety, Security & World-class looks

SPECIAL

Dim : H 93" x W 60" (Door heads sizes vary as per design)

KING

Dim : H 93" x W 60" (Door heads sizes vary as per design)

UPVC WINDOWS

UPVC (Unplasticized Polyvinyl Chloride) windows are a popular choice in modern construction due to their strength, weather resistance, and durability. Below are the key properties and advantages of UPVC windows:

High Durability

Resistant to corrosion, decay, and termites.

Long-lasting, with minimal wear even in harsh climates.

Weather Resistance

Excellent resistance to UV rays, rain, humidity, and temperature fluctuations.

Does not warp or crack easily with heat or cold.

Thermal Insulation

Low thermal conductivity, helps maintain indoor temperature.

Ideal for both hot and cold climates – energy efficient.

Sound Insulation

Good acoustic properties, reduces external noise effectively.

Fire Resistance

UPVC has inherent flame-retardant properties and self-extinguishes when the source is removed.

Low Maintenance

Easy to clean, no need for painting or polishing.

Resistant to dust, stains, and pollutants.

Aesthetic Versatility

Available in various colors and finishes, including wood-like textures.

Can be molded into different shapes and styles (sliding, casement, fixed, etc.).

Eco-Friendly

UPVC is recyclable and contributes to sustainable building practices.

Structural Strength

Higher impact strength compared to normal PVC.

Suitable for both residential and commercial buildings
